OUROBOROS

INSTALLATION

1) Copy the file **'Ouroboros.jsxbin'** into the folder:

PC: "Support Files/Scripts/ScriptUI Panels" of your After Effects installation.
MAC: "Scripts/ScriptUI Panels" of your After Effects installation.

2) Start **'Ouroboros'** (via the "Window" menu in After Effects)

ABOUT

With Ouroboros you can create multiple strokes on one single path in After Effects. This can quickly create some really detailed looking stroke effects in your. I teamed up with Remco Janssen (who created [Expressionist](#)) to create this new version.

After effects plugins typically cost around $30 but Ouroboros will always be a gift to the community. If you find it useful and want to invest, you can name your own price or think about it as buying us a coffee or lunch. When you support us financially and through feedback—it allows us to keep making the tool better over time.
